Dear Members of Congress,

It has been exactly three months since President Obama recess-appointed Dr. Donald Berwick as Chief Administrator of Medicare and Medicaid Services (CMS). In this role Berwick will be charged with implementing ObamaCare's substantial overhaul of both entitlement programs.

For a President that promised unprecedented transparency in his administration, it was deeply disappointing that he bypassed the normal Senate confirmation process for Berwick in order to avoid inquiry over his nominee's radical support of extreme rationing.

Presently, in further violation of the President's transparency pledge, the Administration has repeatedly refused to bring the CMS Administrator before Congress for a hearing on the implementation of ObamaCare.

Without the appropriate oversight of the legislative branch, Berwick will go unchecked in his control over fundamentally re-shaping 1/6th of our economy and controlling a budget larger than that of the Department of Defense.

On this three month anniversary of the Obama Administration's arrogance in recess appointing Berwick and preventing him from appearing before Congress, lawmakers should commit to withholding the funding for his office to implement ObamaCare, effectively tying his hands until he provide the proper transparency that the American people deserve.
Sincerely,

Alex Cortes
